

Alu-clad Flush Casement Timber Window

Livingwood Windows aluminium clad timber windows are made from high quality laminated Scandinavian Redwood. The exterior is clad with maintenance free aluminium cladding painted in a huge range of RAL colours. A selection of glazing bars both inside the sealed units and attached to the outside are available. This system comes in a large variety of configurations.

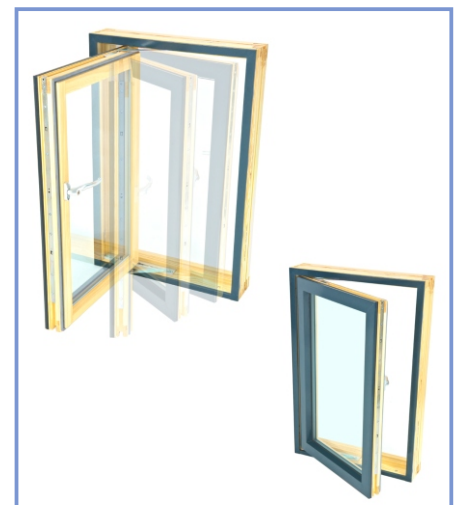

Advantages of wood-aluminium windows:

- Weather resistance;
- Contemporary appearance and sleek design;
- Durability;
- Easy maintenance and cleaning;
- Swing-opening guarantees easy cleaning on both sides of the window.

The durability of the wood is guaranteed by the use of premium Nordic laminated redwood. The windows are fitted with a double-glazed glass unit. Depending on the user's needs, the glass unit may be fitted with glass sheets with different properties – safety, energy efficiency, sound-reduction, protection against the sun.

Warranty

All products come with a five year warranty.

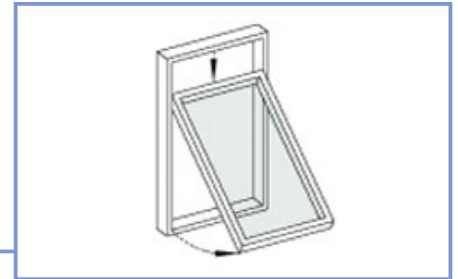

About Livingwood Windows

Our manufacturer started in 1968 as a small joinery workshop specializing in the manufacture of windows and doors. Now an established company they are renowned for their quality and customer service. The factory is currently 3500 sqm. and has the latest machinery installed. The factory is staffed with experienced carpenters who are highly motivated and skilled. They are our biggest asset enabling us to combine good old fashion craftsmanship with the speed of modern technology.

Livingwood Windows Ltd was started by building specialists with over 25 years experience supplying the UK. Livingwood Windows has been established to satisfy a growing demand for high quality window and door systems to suit all budgets. We can supply varying styles of windows and doors, from traditional to contemporary covering all building styles and customer requirements. All our products can be supplied in either slow growing pine from Northern Europe, Meranti and Oak. The final product delivered to site is factory finished; all that is required is the installation.

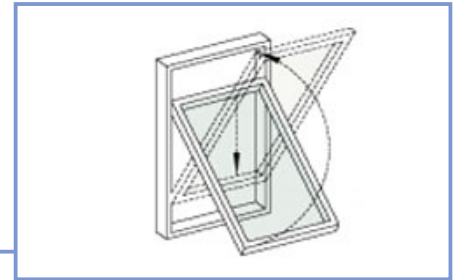

Top-guided window *

Large window surfaces; the maximum area of the operable window frame is 1.84 sq. m. Concealed hinges with slides give the window a contemporary appearance and enhance safety. If necessary, the window can be used as an emergency exit. It is recommended to use this window in places where it can be cleaned from the outside, e.g. on a balcony or the ground floor.

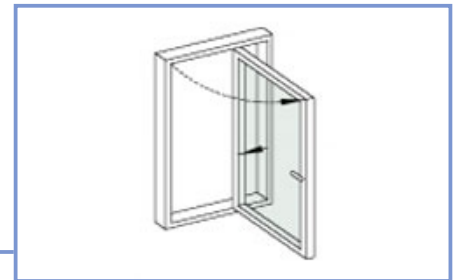

Top-swing window *

Large window surfaces; the maximum area of the operable window frame is 2.05 sq. m. Concealed hinges with slides give the window a contemporary appearance and enhance safety. The window frame can be rotated 180°, so that the window is also convenient to use higher than the ground floor. This type of window can be cleaned from both sides without having to leave the room.

90° Side-hung window *

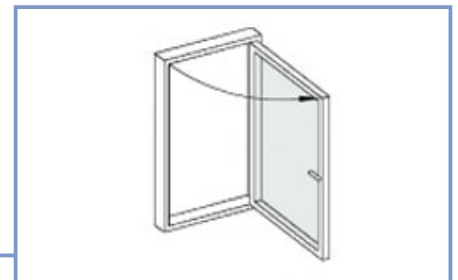

Large window surfaces; the maximum height of the openable frame is 1.6 metres. Concealed hinges with slides give the window a contemporary appearance and enhance safety. The window frame can be rotated 90°. This makes the window convenient to use on floors higher than the ground floor and allows enough space between the side jamb and the frame, so the windows can be cleaned on both sides.

Side-hung window

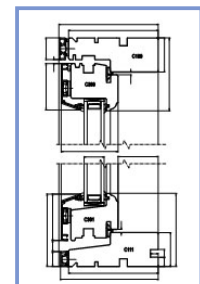

This window has a traditional design and can be used as an emergency exit, if necessary. The window surface can also be divided with a mullion.

(*can be ordered with locking devices which have passed the BS7950 safety testing, secure by design.)

Technical specification of the window:

- Cross sections: jamb 44 x 119/121 mm; frame 57 x 61 mm;
- Spacer bar 61 x 99 mm; glazing bars 57 x 61 or 44 x 61 mm;
- Laminated pinewood A1 to A3;
- Glass and cores: double-glazed glass unit;
- Locking: PN-Beslag hinges, Fix cremone bolts;
- Fix or Abloy handles, RUKO locking systems;
