

Timber Tilt & Turn Inward-opening Window

The inward-opening wooden window offered by Livingwood Window, also known as the German window, is an inward-opening, tilt and/or turn type window with a single frame. As a window, it has a practical structural design as the window can be opened in two ways: it opens traditionally onto the side or tilts at the top for ventilation.

Advantages of the inward-opening window:

- Practical tilt and/or turn functions combined in a single window;
- Excellent thermal resistance properties – the window has a U-value of 0.95 W/m² ;
- FSC-certified timber;
- Easy maintenance and cleaning.

Technical specification of the window:

- Cross sections: jamb 78x78, frame 78x78;
- Post between panels, vertical 105x78, horizontal 78x78;
- Tenon-jointed window bar 54x78 and 83x78;
- Laminated pinewood A1 to A3;
- Closures: GU Unijet hinge system, Hoppe handles;
- Glass and cores: double-glazed (26mm) or triple-glazed (40mm) glass;
- Veneer or MDF core panel with expanded foam layer (26mm or 40mm);

The windows have double-glazed units or triple-glazed units for greater energy efficiency. The insulating glass units can consist of various types of panes, depending on the user's requirements – reinforced/safety glass, energy-saving or acoustic glass, glass with sun protection properties.

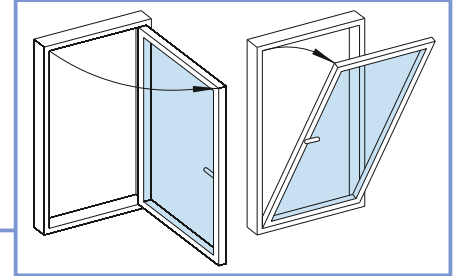

About Livingwood Windows

Our manufacturer started in 1968 as a small joinery workshop specializing in the manufacture of windows and doors. Now an established company they are renowned for their quality and customer service. The factory is currently 3500 sqm. and has the latest machinery installed. The factory is staffed with experienced carpenters who are highly motivated and skilled. They are our biggest asset enabling us to combine good old fashion craftsmanship with the speed of modern technology.

Livingwood Windows Ltd was started by building specialists with over 25 years experience supplying the UK. Livingwood Windows has been established to satisfy a growing demand for high quality window and door systems to suit all budgets. We can supply varying styles of windows and doors, from traditional to contemporary covering all building styles and customer requirements. All our products can be supplied in either slow growing pine from Northern Europe, Meranti and Oak. The final product delivered to site is factory finished; all that is required is the installation.

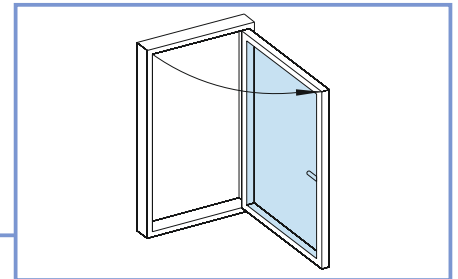

Tilt and turn window

The window opens inwards, in two different ways - the window opens fully inwards, hinged at the side, or tilts a little inwards from the top, into a ventilation position of 100 to 200 mm, depending on the window height, plus 'micro ventilation'. The permitted load on closures is max. 130 kg.

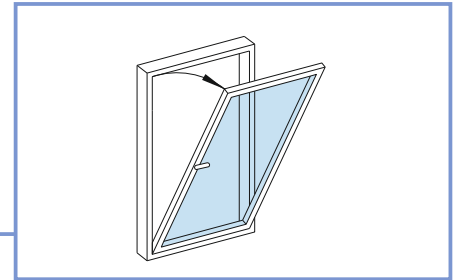

Casement window

This is the traditional inward-opening side-hung casement window; it can also be used as an emergency exit, if necessary. The permitted load on closures is max. 130 kg.

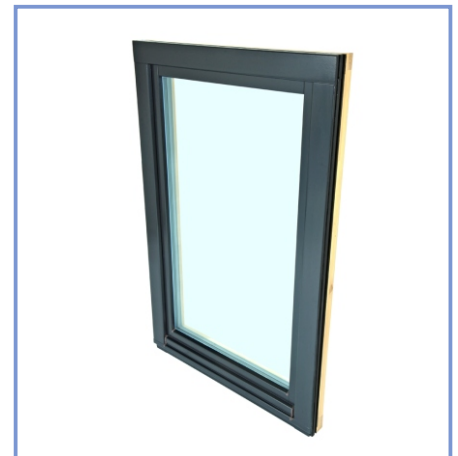

Tilt window

The window tilts inwards from the top, but only a little, to allow ventilation. The permitted load on sash is max. 130 kg.

Non-opening window

This is the most inexpensive window that lets in light. The glass unit is fitted right into the jamb and the window cannot be opened.

Warranty

All products come with a five year warranty.
