

Sliding Sash Timber Window

The Livingwood Sliding Sash window design ensures that windows have ideal weather performance even on stormy days. When opening our window the sashes are separated, thereby avoiding wear on the weather strip. When closing the window the sashes are pressed against the weather strip, allowing the window to shut very tightly.

Advantages of our Sliding Sash Window:

- Contemporary appearance and sleek design;
- Excellent storm proof detailing;
- Excellent thermal performance;
- Durability and ease of use;
- Made to measure every time.

Technical specification of the window:

- Frame: 51x136mm
- Sash: 61x61mm
- Transom: 51x136mm
- All profiles laminated pine A1-A3;
- All parts have been vacuum deep-impregnated with the GORI impregnation system;
- Maximum permitted mass for the sliding sash: 40k;
- Insulated glass unit: Double-glazed with Lowe glass, argon filled, the maximum U-value of the glass unit is 1,1 W/m²K;
- Hardware: Torso pre-tensioned balances, Fix espagnolettes, Hoppe and Titon lockable handles;

About Livingwood Windows

Our manufacturer started in 1968 as a small joinery workshop specializing in the manufacture of windows and doors. Now an established company they are renowned for their quality and customer service. The factory is currently 3500 sqm. and has the latest machinery installed. The factory is staffed with experienced carpenters who are highly motivated and skilled. They are our biggest asset enabling us to combine good old fashion craftsmanship with the speed of modern technology.

Livingwood Windows Ltd was started by building specialists with over 25 years experience supplying the UK. Livingwood Windows has been established to satisfy a growing demand for high quality window and door systems to suit all budgets. We can supply varying styles of windows and doors, from traditional to contemporary covering all building styles and customer requirements. All our products can be supplied in either slow growing pine from Northern Europe, Meranti and Oak. The final product delivered to site is factory finished; all that is required is the installation.

Windows are fitted with Torso balance springs and with a handle on the bottom sash. For windows with an openable top sash the handle is fitted on the top rail. The bottom sash has the option to tilt inwards in order to allow easy cleaning of the bottom sash.

The window can be combined with transoms, a fixed light and fixed sash. Ogee mouldings are applied to the inside of the sash profiles. For extra decoration the top frame can be fitted with decorative horns on the outside.

The long life of wood is guaranteed by the use of slow-grown Scandinavian Pine and the GORI treatment system. Double glazed sealed units are used to maximize energy saving and noise reduction levels. Anti-solar glass is available as an optional extra.

Warranty

All products come with a five year warranty.
